React   Next.js   JavaScript   TypeScript   Redux & Redux Toolkit (RTK)   React Query   Tailwind CSS   Shadcn/UI   Material UI (MUI)   Motion   Git & GitHub   HTML   CSS   Bootstrap

AWARDS & RECOGNITION

Best Frontend Developer Award | iRoid Solutions, Surat | May 2024
- Awarded for outstanding dedication and contributions to frontend development within the company.

INTEREST

- Artificial Intelligence
- Web Design and Animation
- Learning New Technologies
- Prompt Engineering
- User Experience (UX) Research

EXPERIENCE

Frontend Developer | iRoid Solutions, Surat, Gujarat
07/2023 - 07/2025
- Developed and maintained responsive front-end interfaces for various production-level applications and admin dashboards.
- Collaborated with backend teams to integrate RESTful APIs, socket, payment gateways, and real-time data handling.
- Integrated advanced functionalities like real-time chat (Socket.io), drag-and-drop interfaces, and payment solutions (Payspot) into various web applications.
- Provided technical support and guidance to junior frontend developers, helped them follow best practices, improve code quality, and assisted with code reviews and issue resolution.
- Actively contributed in Agile meetings, communicated progress with stakeholders, and collaborated with designers to deliver seamless, user-friendly interfaces.

SELECTED PROJECTS

Poslic 🔗
- Technologies: React, Bootstrap
- Developed Serbia's leading TaskRabbit-like service marketplace, building the full responsive frontend with React, integrating Payspot for secure payments, and enabling real-time in-app chat for seamless user-tasker connections.

SBM - Smart Building Management
- Technologies: React, Material-UI (MUI), React Query
- Engineered a multi-tier web administration system with role-based access for Service Providers, Building Admins, and Super Admins.
- Developed complex modules for service request management, technician scheduling, and comprehensive invoice/payment tracking.
- Implemented dynamic dashboards and real-time notification systems to streamline building operations.

GOBBB - Go Brick By Brick
- Technologies: Next.js, Tailwind CSS, Redux
- Built interactive features including audio player, quiz systems, and color-coded performance tracking.
- Built user and admin-managed lesson pages with drag-and-drop content organization.
- Engineered a subscription management system and daily streak motivation for user engagement.
